

# ggplot2

4 марта 2015

Виноградова Светлана

## Author

ggplot2 was developed by Hadley Wickham, assistant professor of statistics at Rice University, Houston. In July 2010 the latest stable release (Version 0.8.8) was published.

### устанавливаем и загружаем пакет

```
install.packages("ggplot2")
```

```
library("ggplot2")
```

### данные, которые мы будем использовать для демонстрации

```
head(diamonds)
```

```
head(mtcars)
```

|   | carat | cut       | color | clarity | depth | table | price | x    | y    | z    |
|---|-------|-----------|-------|---------|-------|-------|-------|------|------|------|
| 1 | 0.23  | Ideal     | E     | SI2     | 61.5  | 55    | 326   | 3.95 | 3.98 | 2.43 |
| 2 | 0.21  | Premium   | E     | SI1     | 59.8  | 61    | 326   | 3.89 | 3.84 | 2.31 |
| 3 | 0.23  | Good      | E     | VS1     | 56.9  | 65    | 327   | 4.05 | 4.07 | 2.31 |

```
# сравним qplot и ggplot
```

```
# qplot histogram
```

```
qplot(clarity, data=diamonds, fill=cut, geom="bar")
```

```
# ggplot histogram -> same output
```

```
ggplot(diamonds, aes(clarity, fill=cut)) + geom_bar()
```

```
### как мы используем qplot
# scatterplot
qplot(wt, mpg, data=mtcars)
# можно менять данные прямо внутри
qplot(log(wt), mpg - 10, data=mtcars)
# добавим aesthetic mapping
qplot(wt, mpg, data=mtcars, color=qsec)
# поменяем размер точек
qplot(wt, mpg, data=mtcars, color=qsec, size=3)
# используем alpha blending
qplot(wt, mpg, data=mtcars, alpha=qsec)
```

```
qplot(wt, mpg, data=mtcars, colour=cyl)
levels(mtcars$cyl)
qplot(wt, mpg, data=mtcars, colour=factor(cyl))
# use different aesthetic mappings
qplot(wt, mpg, data=mtcars, shape=factor(cyl))
qplot(wt, mpg, data=mtcars, size=qsec)
# combine mappings (hint: hollow points, geom-concept, legend combination)
qplot(wt, mpg, data=mtcars, size=qsec, color=factor(carb))
qplot(wt, mpg, data=mtcars, size=qsec, color=factor(carb), shape=l(1))
qplot(wt, mpg, data=mtcars, size=qsec, shape=factor(cyl), geom="point")
qplot(wt, mpg, data=mtcars, size=factor(cyl), geom="point")

# bar-plot
qplot(factor(cyl), data=mtcars, geom="bar")
```

# генерим данные и представляем их в удобном виде

```
normDistr <- rnorm(1000, mean=2, sd=1)
```

```
lognormDistr <- rlnorm(1000, meanlog=1, sdlog=0.5)
```

```
