

## 1ML5:B|PDBID|CHAIN|SEQUENCE

The figure displays a 2D grid representing RNA secondary structure probability. The x-axis and y-axis are both labeled with the same RNA sequence: GCGGAUUAAGCUAGUUGGGAGAGCGGCCAGACUGAAAGAUUCUGGAGGUCCUGUGUUCGAUCCACAGAAUUCGCACCA. A diagonal line runs from the bottom-left to the top-right through the center of the grid. Black squares are positioned at specific grid points along this diagonal line, creating several horizontal bands of higher probability. The background is filled with small gray dots representing lower probability values.
